

# Megan Motter

## *Dark Skies*

The night sky was Megan's muse as she created light shields, brochures for the Cave Creek Dark Skies Initiative which included a YouTube video, an article for her school's newspaper, and taught younger Girl Scout troops about the night sky, helping them earn their space badge. Her Girl Scouting journey of 10 years introduced Megan to new friendships, connecting her with new experiences that gave her the courage to explore new things and develop a confident attitude. Megan plans to major in STEM to help the ecosystem through scientific research.
